## Discover how having a UK number abroad can make a world of difference to your business

Living or running a business from abroad can be difficult, so why not make it easier for you and your customers, family & friends with FEATUREPLUS? It allows you to have a UK number abroad with online access to a whole host of advanced calling features. It's the ideal way to ensure you maintain a UK presence, no matter where you are in the world, allowing the people contacting you, whether they are customers, family or friends to be charged at UK local call charges, and not at international call charges!

### What is FeaturePlus?

FEATUREPLUS is an easy to use telephony service that enables you to make voice calls across any broadband connection using your existing phones, wherever you are. As it's a portable system you can log in anywhere that has access to a broadband connection, like an internet café or hotel which is ideal if you're always on the move. It also offers you reduced call costs and FREE site to site calls (FeaturePlus to FeaturePlus) which are routed over your broadband connection through the **net:telecom** network.

### The benefits to you and your customers

We give you a UK number, so;

- Customers are billed in sterling so they need never know they were dealing with a company / Individual not based in the UK
- Family, friends and colleagues are charged UK call charges (lower rates than BT!)

FeaturePlus gives you;

- NO NEW handsets are required. You can use your existing phones
- FREE calls to your other FEATUREPLUS numbers, so FREE site to site and internal calls, meaning reduced bills
- Plug and play hardware with a user friendly, intuitive 'On screen' system.
- Customers / Any calls are never lost

### Simple to install

The simple plug and play kits come pre-configured and are very easy to use. The 'On Screen' interface opens up access into a brand new world where you are in control of what happens to your telephone calls – be it Call handling or Call Management. And best of all, it can all be up and running internationally in 5 to 14 days. We also have a Support Team Network that is only a phone call away if you need help, 24 hours a day.

**What does it Cost?**

A small one-off fee provides you with all of the automatically configured hardware required. Calls are charged from **£1.2pence per minute** and you can rest assured that there are no hidden charges to worry about. Plus, if you order by 30<sup>th</sup> June 2006 we will deliver your FeaturePlus service to you FREE of charge, no matter where you are!

**Who are we?**

net:telecom is an independent Telecoms supplier to the B2B market in the UK. net:telecom is a fully owned subsidiary of Hi-Tech communications services LTD, based in London, UK. We believe that by offering our customers truly independent and unbiased advice and services we will continue to remain at the forefront of our industry. That's why we felt you may be interested in our FEATUREPLUS service. It really could make enhance business communications and bottom-line.

**Call us today and make it happen**

FEATUREPLUS is ideal for British based companies with staff based abroad, individuals who travel with work, SoHo's, small offices and companies with small multiple sites outside the UK. It's also a cost effective way to make sure you keep in touch with family and friends so make sure you tell them all about it. One of our trained staff will be happy to discuss your individual requirements and how FEATUREPLUS can make a world of difference to your business.
